

WILD BIRD REHABILITATION STATION

SERVICES:

The owner of Wild bird rehabilitation station (Savvaļas putnu rehabilitācijas stacijas) is Uģis Bergmanis, an experienced environmental expert and one of the leading researchers of small eagles in Latvia and Europe.

- * Meeting with environmental experts Uģis Bergmanis.
- * Wild bird rehabilitation station inspection.
- * Interesting nature and experience stories.

A predatory bird rehabilitation station is arranged in the owner’s private rural property “Tiltakalni”, in Madona Municipality, Barkava Civil Parish. The purpose of the activities performed by the station is the rehabilitation and the return of specially protected species of birds to the nature and the reception of falconry and fluffy birds, as well as black storks and capercaillies for which incurable bodily injuries or limb fractures have not been detected.
